working together

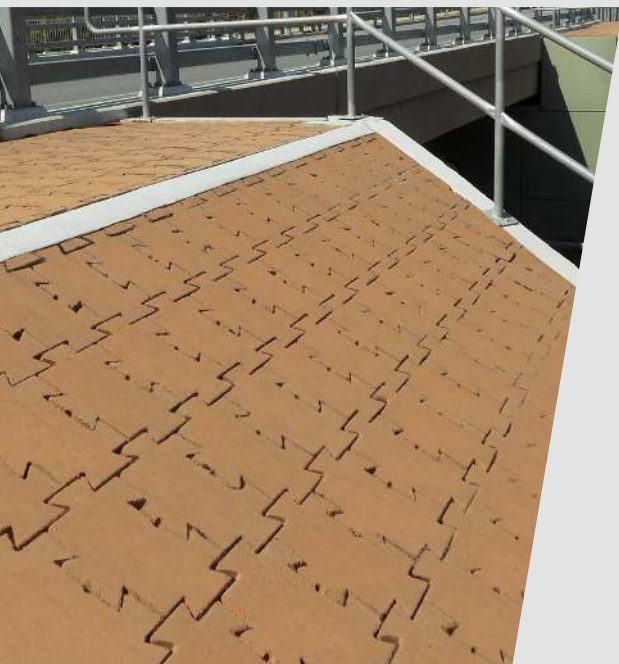

# Erosion Control

## Rigid, reliable and environmentally responsible products for managing erosion

- Trafficable turf paver solutions
- Land stabilisation applications including boat ramps
- Solutions for revetments, waterways and water run off areas

# Bridge Abutments

## Installation of quality assured interlocking Bridge Abutment units

- Approved product for "Bridges and Other Structures" in TRM's approved list
- Unit's compliant with MRT03 – Interlocking Blocks
- Economical solution for Bridge Abutments in comparison to alternate products
- Interlocking system provides positive lock up to adjacent units and reduces vandalism

# Paving

## Machine lay and paving automation

- Install up to 800m<sup>2</sup> per day per machine
- Specialty machine lay pattern configuration
- Increased speed and decreased OH&S issues with material handling
- Cost effective over whole of life
- Architectural flexibility with various size and colour options

## Commercial paving

- Supply and installation of large format pavements
- Trafficable and pedestrian paving options
- Streetscapes, shopping centres, public works
- City of Sydney approved pavement supplier
- Suitable for use on pedestal pods
- Architectural flexibility with various size and colour options

## Permeable paving

- Allows water to infiltrate through the surface
- Reduces storm water runoff and pollution
- Complete and partial filtration system available
- Architectural flexibility with various size and colour options

# Retaining Walls

We're the leaders in the design and manufacturing of quality retaining wall solutions. We can help to design, supply and install a solution for:

- o Residential and commercial sub divisions
- o Commercial retaining projects
- o RTA and Main Roads walling projects
- o Boundary fences atop of retaining walls
- o No Fines Concrete, Geogrid and Gravity retaining walls

We also specialise in tiered retaining wall designs – ask us how our tiered solution can overcome retaining challenges in your next project.

# Concrete Sleepers

We manufacture high quality concrete sleepers in a fully automated specialty sleeper production plant. This state-of-the-art machine provides increased quality control, precision steel placement and high strength concrete sleepers in a variety of shapes, sizes and textures.

Our engineered sleeper design solutions are used for:

- o Low footprint retaining walls
- o Detention basins
- o Tiered retaining walls
- o Site specific product and engineering solutions
- o Residential sub divisions and commercial walls

# About Us

**Adbri is Australia's leading masonry manufacturer with 15 sales and manufacturing facilities located across Australia's East Coast, South Australia and Tasmania.**

We specialise in the supply and installation of masonry products to large scale commercial and civil projects.

Adbri Masonry is a wholly owned subsidiary of Adelaide Brighton, a leading integrated construction materials company and member of the ASX 100.

Our Contracting Services Division provides a full range of services from design support to project management and certification with single point accountability for your project.

The products and services that we provide are supported by our experienced Engineering Team and on site N.A.T.A accredited Testing Laboratory. This allows us to provide quality, reliability, expertise and peace of mind in equal parts.

We are proud to provide products and solutions to assist our clients develop award winning commercial building and landscape projects throughout Australia.

## **Our Contracting Services team specialise in:**

- o Project management of retaining walls and paving projects
- o Product supply and installation
- o Engineering design for our range of masonry products in civil, industrial and commercial applications
- o Certification services for the contracted scope of works
- o Ensuring safety standards on all our projects

## **Your project can benefit from our experience**

- o Over 55 years of professional engineering experience
- o Market leading reliability developed over 50 year history
- o Support from our N.A.T.A. Accredited Testing Laboratory
- o Certified Quality Management System confirming to AS/NZS ISO 9001 : 2015
