# Holiday at Home

Australia is blessed with a year-round climate and an incredible natural environment. With such beauty on our doorstep, it's no surprise that we are passionate about the great outdoors.

For many, our fondest memories are in the outdoors; from camping trips and adventures at beaches, parks and even our backyards which have long been a favourite place to spend time with family and friends. It's for this reason that we strive to create beautiful backyards to enjoy the outdoors at home.

While land sizes are getting smaller, the one commonality in places of any size is the desire to have a great outdoor area. In larger properties, an Aussie inspired rural backyard is a great design choice because they're as practical as they are visually pleasing.

"The key to designing a good rural inspired garden is to treasure your space and have discipline around how you fill it. I recommend taking full advantage of the space by creating an alfresco dining area, there's nothing that brings the family together like enjoying a meal away from the distractions of technology. Instead, build a fire pit which I like to call nature's TV, it really is the must-have item in any rural garden" says award winning landscape designer Jason Hodges.

# Relax in Rural

The essence of a rural garden is the gathering area which will either be a casual entertaining spot around a fire pit or a more formal alfresco dining area. When the yard is bigger, take the entertaining area further 'into' the garden so you can enjoy more of your land – when there's outdoor spaces to enjoy, don't waste it by cramming your patio up against your brickwork!

BEFORE

AFTER

## FROM ROUGH PATCH TO RURAL RETREAT

- ✓ Create a spacious rural retreat that makes the most of your land
- ✓ Invest in your home, increase its value and improve your lifestyle
- ✓ Holiday at Home – create a rural garden that your family will enjoy year-round

"Create the look with a fire pit and make this area the central entertaining spot by building a concrete block fire pit enclosure to keep family and pets safe. Install some casual seating in the way of log stools that are within marshmallow reach! Make maintenance easier by bordering the garden with a simple concrete Lawn Edge paver. Consider the sun (and heat) and create a shady spot with a eucalyptus tree which will give you a special spot to enjoy throughout the day."

Every backyard is capable of being transformed into a spacious rural garden, even yours! To prove this point, we completely made over this large backyard that was wasted space and difficult to maintain. The end result was this stunning, spacious and practical rural backyard that's quickly become the family's favourite place to entertain. You can get the look in your home too!
